Concepts in Minimally Invasive Spine Surgery

November 9, 2009
San Francisco, California

This course is designed to train participants to **identify the problems associated with early degenerative spinal conditions** that become debilitating and have failed conservative care management; **assess the need for intervention** and discuss options; **identify the risks, pros, cons, and benefits** of each option as it relates to a variety of spinal conditions; **consider application of the appropriate treatment** to different advancing disease pathologies; and **use fluoroscopic techniques** to identify anatomical structures that represent landmarks for small incision intervention.

D. Greg Anderson, MD
Thomas Jefferson University
Philadelphia, Pennsylvania

Carl Laurysen, MD
Olympia Medical Center
Beverly Hills, California
